

Environmental and Sustainability Policy

Andrew Malkin

Director

Version 1.02, Dated 8th November 2016

As a management consultancy, **Solutioneering (UK) Limited** is committed to promoting sustainability and protection of the environment in which we work and operate. Our business strategy is based on a collaborative working approach in conjunction with our clients, consortium members, supply chain partners and other interested parties, all working as a team in order to realise solutions to the benefit of all.

To achieve this, our management activities are organised and managed through an Environmental Management System structured around the ISO 14001 Environmental Management standard, and the ISO 50001 Energy Management standard. **Solutioneering (UK) Limited** recognises that our most significant and long-term impact on the environment is the consumption of fossil fuels resulting from our business travelling and logistics, and endeavours to utilise public transport wherever possible. We are totally committed to eliminating the need to travel and actively use video conferencing as much as possible.

In the implementation of our environmental management system, we will carry out the following:

Rules	<ul style="list-style-type: none">• Comply with relevant statutory, legal and other requirements.• Work proactively with regulators and other interested parties to protect the environment in which we operate and depend upon long-term.	Maintain compliance with statutory, regulatory, legal and other requirements.
People	<ul style="list-style-type: none">• Educate, train and motivate our employees and partners to carry out their duties in an environmentally responsible and sustainable manner and in accordance with this policy.• Plan and source services, goods and products locally wherever possible to help promote the local economy and to reduce the carbon footprint.	Ensure people improve their sustainability awareness and make a positive contribution to waste reduction and managing power.
Services	<ul style="list-style-type: none">• Plan and act to minimise the impact of our operations on the environment, ecology and amenity of our project work areas.• Seek to reduce the consumption of primary materials, recycle where possible, minimise waste and eliminate duplication.• Reduce power consumption, adopt energy efficient equipment and source services and materials in a responsible manner.	Ensure conservation is included in planning and communication, and consumption reductions are considered at all stages of service delivery.

We will improve the effectiveness of the environmental management system through regular analysis of information and data gained from the following review processes:

Measure	<ul style="list-style-type: none">• Internal audit results and findings• Customer feedback• Non-conformances, and• External audit reports by clients and/other agencies	Welcome feedback leading to positive improvements, waste and carbon reductions.
----------------	--	--

This environmental and sustainability policy will be communicated at management meetings; included in starter packs for new employees and partners, and be posted on our office noticeboards and website. It will be available to interested parties on request, and be used in our pre-qualification and tendering exercises.
